PROFILE

I build useful, well-structured applications, from Java back-ends to web interfaces, and I take a close interest in networks (**Cisco CCNA 1 & 2** certified). After a first application **deployed and used by a company**, I am looking for an internship to grow within a team, bringing my diligence and good spirits along.

FLAGSHIP PROJECT

STEА — Logistics management and stock tracking

Jul. - Sep. 2026 · in production

STEА Trans Euro Afrika SARL, Lomé · Design and development of the whole system: back-end, interface, desktop application, deployment.

- **24 business modules** (items, warehouses, orders, deliveries, stock counts, accounting, statistics...) for **8 user roles**, with permissions and an audit log.
- Spring Boot / MySQL REST API: **173 endpoints** and **141 automated tests**.
- React interface shipped as a Windows desktop application (Electron): **29 releases published** with automatic updates.

OTHER PROJECTS

Rental management application

Java · SQL Server · MVC

Managing properties, rental contracts and rent payments (academic project).

Dynamic web platform

PHP · MySQL · HTML/CSS

A site with a database, user authentication and an administration back-office for content.

Secured network architecture

Cisco Packet Tracer

A multi-site company network simulated and configured: dynamic routing, VLAN segmentation, access control lists.

EDUCATION

2025 - 2026

Computer Science, year 2 · IAI-TOGO

Software Engineering & Information Systems track: Java and MVC architecture, relational databases, web development.

2024 - 2025

Computer Science, year 1 · IAI-TOGO

Algorithms, programming (Python, C), HTML / CSS, introduction to networks.
